

# Changing Resolution

Follow these simple steps to change your screen resolution.

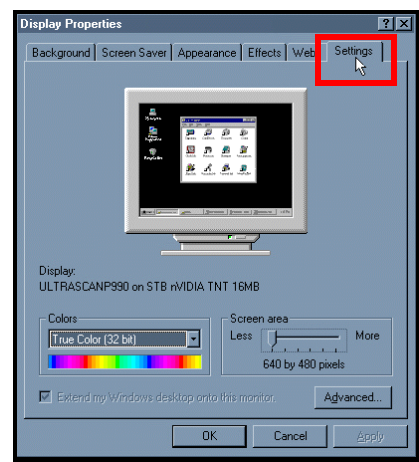

1. Begin by clicking the **Start** button, selecting **Settings**, and then clicking **Control Panel**.

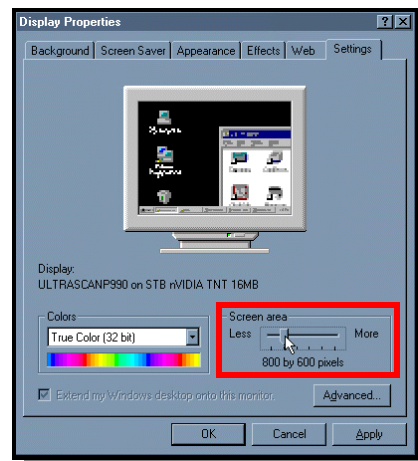

2. This will open a new window. Double-click the **Display** Icon.

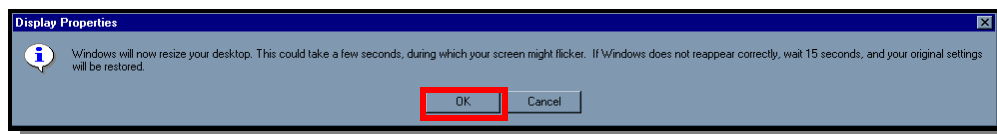

3. A dialog box will open. Click the **Settings** tab at the top of the box.

4. You will see an area labeled **Screen Area**. Slide the toggle until the text below reads **800 by 600 pixels** or **1024 by 768 pixels**. When this is done, click the **OK** button to apply the changes.

5. A confirmation dialog box will appear telling you that the changes will be applied and that your screen may flicker during the process. Click the **OK** button to continue.

6. After the changes are made, a confirmation dialog box will appear asking if you want to keep the current settings. Click the **Yes** button to finish the process.
